Undergraduate Student Job Opportunities

Working at the ITL Program means interacting with and guiding students, assisting faculty, and supporting the ITL Program staff with myriad projects related to engineering education. We are committed to honoring unique backgrounds and experiences. Join our team and help us build a more inclusive and diverse academic and engineering culture — apply today!

Positions	Descriptions and Requirements

Engineering Support

The **Engineering Support Students** work in a customer service and technical support role, providing friendly, enthusiastic and efficient help to engineering students, faculty and staff in the Integrated Teaching and Learning Laboratory (ITLL). Engineering Support Students are undergraduate engineering students who help oversee the ITLL, assisting students with projects, conducting workshops, supporting experimental modules, and ensuring the building maintains a standard of excellence and security. If you enjoy learning new engineering skills and helping others to do the same, please apply below.

Salary: The salary for this position starts at $17.00/hour through Spring 2026, with a $0.25/hour raise for each Fall, Spring, and Summer semester worked. Students are paid biweekly. Note: Effective Fall 2026, minimum pay salary will increase to $18.25/hour. Work study students are encouraged to apply.

Full Consideration Dates:

- Fall Semester - December 15, 2026
- Spring Semester - May 15, 2027
- Summer Semester - August 15, 2026

These positions will remain open until the listed full consideration date. Applications are viewed on a rolling basis during each semester. It is advantageous to apply by the first deadline to get priority review for open positions for the semester, however all applications submitted up until the full consideration dates will be reviewed. You can expect to hear back regarding job determination within 2-4 weeks of submitting the application materials.

Apply today!

Undergraduate Student IT Systems Administrator

The Integrated Teaching and Learning Program is looking for **Undergraduate Student IT Systems Administrators** to help in the daily operations and support of our technical enterprise. In addition to the ITL Program, the IT team supports the Idea Forge, Aerospace Engineering, Engineering Connections, and several other departments and programs across the college.

This position is expected to work 10 hours per week while classes are in session; however, the hours are flexible. We prefer students who have the availability to continue employment as long as they are a CU student. First-year and sophomore students of diverse backgrounds are strongly encouraged to apply. More information regarding the position and expectations can be found in the application below.

Undergraduate Student Software Engineer

The Integrated Teaching and Learning Program (ITLP) IT team is looking for undergraduate students to help develop software to support a wide range of services, spanning the ITLP, the Idea Forge, Integrated Design Engineering, Aerospace Engineering, Mechanical Engineering, and TeachEngineering.org. We support up to 11k local users and up to 4 Million users globally through a wide-range of technologies. We offer practical experience supporting the IT needs of a live/production environment. In addition to hands-on training and support, you will work alongside full-time software developers, systems administrators, and other fellow CU student developers. Our goal is to provide an innovative and stable IT ecosystem that empowers hands-on engineering-focused education across the College of Engineering. First-year and sophomore students of diverse backgrounds are strongly encouraged to apply. More information regarding the position and expectations can be found in the application below.
